Risks

INTRODUCTION

ARPRIC is an India based export focused brand supplying high quality sesame seeds Supplying to international markets across Asia and Middle East. We work closely with selected processing units and supervise strict quality control to ensure consistent purity and controlled moisture levels. We focus on long-term partnerships with importers and distributors.

WHY CHOOSE ARPRIC

- Quality Supervision at Processing
- Stage Controlled Moisture & Purity Levels
- Flexible Packing Options
- Timely Shipment Coordination
- Transparent Export Documentation

PRODUCT SPECIFICATIONS

NATURAL SESAME SEEDS

ARPRIC supplies export grade natural sesame seeds sourced from reliable processing units in India. Each batch is carefully cleaned, graded, and supervised to maintain consistent purity and controlled moisture levels suitable for international buyers.

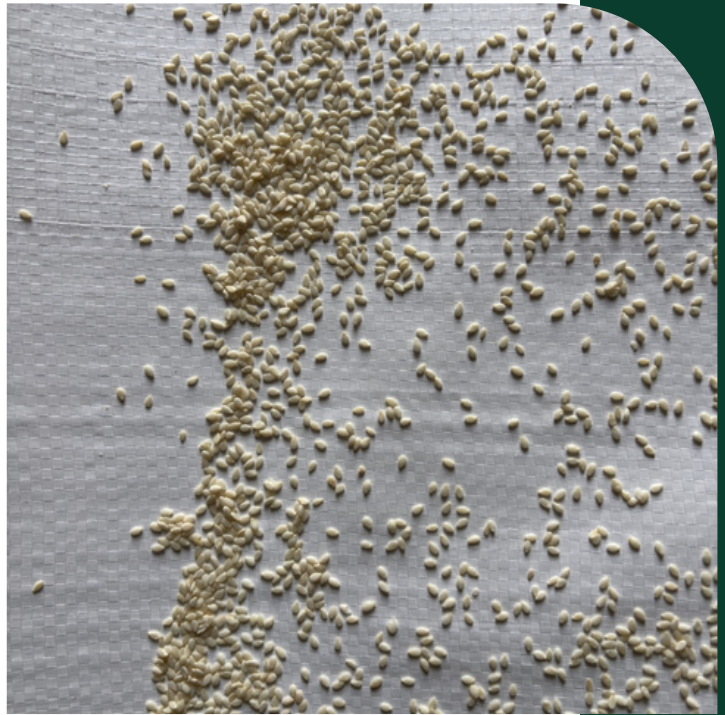

Natural sesame seeds are widely used for oil extraction, food processing, bakery applications, and industrial use. We ensure structured quality control before dispatch to maintain uniform standards across shipments. Specifications can be customized as per buyer market requirements.

KEY SPECIFICATIONS:

- Purity: 99.95% Min (or as per buyer requirement)
- Moisture: 6% Max
- FFA: As per requirement
- Color: Natural white
- Packing: 25kg / 50kg PP Bags
- Loading Capacity: Approx. 19–21 MT per 20ft container

HULLED SESAME SEEDS

ARPRIC offers high quality hulled sesame seeds processed through advanced hulling and color sorting systems to meet food grade export standards. The seeds are uniform in color, low in moisture, and suitable for bakery, confectionery, tahini production, and other food applications.

Our supply process includes close coordination with selected processors to ensure stable quality and shipment reliability for international markets.

Specifications can be customized as per buyer market requirements.

KEY SPECIFICATIONS:

- Purity: 99.95% Min (or as per buyer requirement)
- Moisture: 6% Max
- FFA: As per requirement
- Color: Uniform white
- Packing: 25kg / 50kg PP Bags
- Loading Capacity: Approx. 19–21 MT per 20ft container

BLACK SESAME SEEDS

Available on special order basis only, with specifications provided as per buyer requirement.

ARPRIC supplies black sesame seeds sourced from reliable processing units in India and cleaned to meet export-grade standards. These seeds are widely used in bakery, confectionery, oil extraction, and traditional food applications.

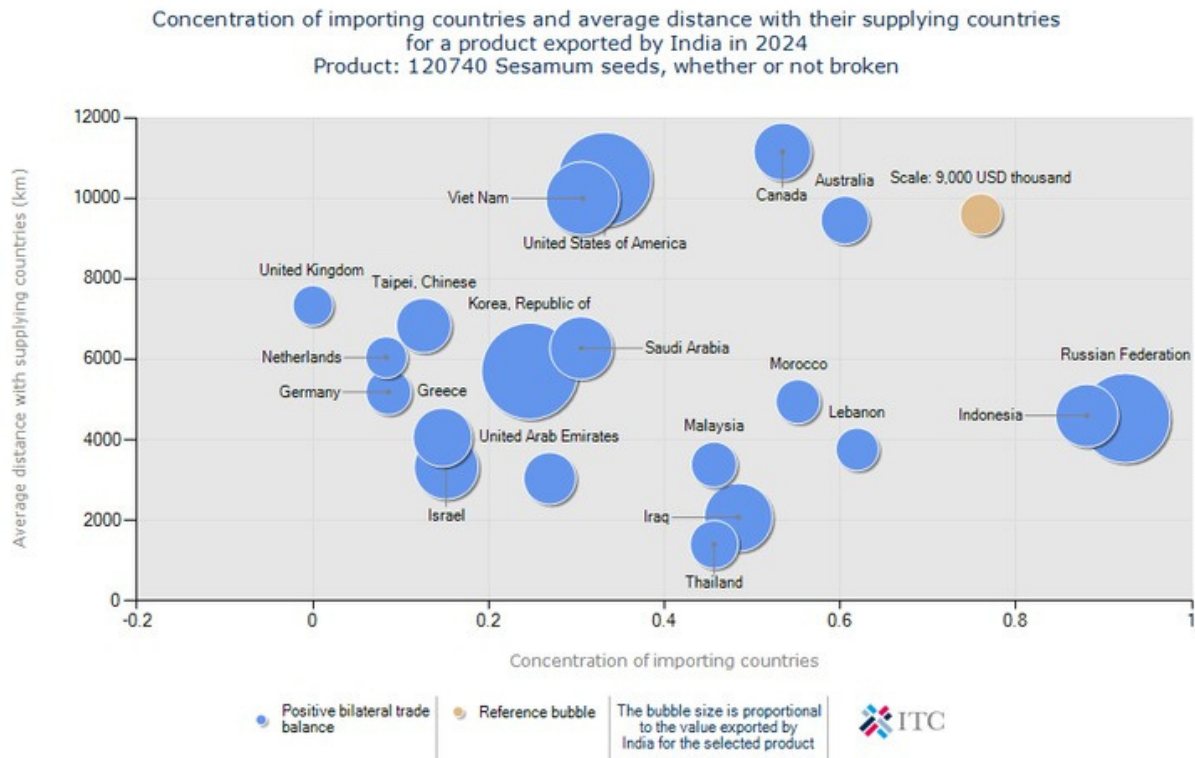

We ensure proper cleaning, moisture control, and packing supervision to maintain consistent quality across shipments.

Specifications can be customized as per buyer market requirements.

CERTIFICATIONS & COMPLIANCE

- ISO Certified Quality Management System

GLOBAL DEMAND

MARKET OUTLOOK – INDIAN SESAME SEEDS (2024)

According to international trade data for 2024, Indian sesame seeds continue to witness strong and stable demand across major importing countries. Indonesia remains one of the key markets, driven by consistent consumption in food processing, bakery, oil extraction, and industrial applications.

India has strengthened its position as a reliable global supplier through structured processing systems, competitive pricing, and quality focused export practices.

With steady international demand and expanding market reach, Indian sesame exports continue to show sustained global momentum.

PROCESSING & QUALITY CONTROL SYSTEM

At ARPRIC, sesame seeds are processed through carefully selected and quality assured processing units in India. Each stage of cleaning, grading, and packing is supervised to maintain export grade standards suitable for international buyers.

Processing Steps:

- Raw material procurement from verified suppliers
- Pre-cleaning and impurity removal
- Gravity separation and grading
- Color sorting (where applicable)
- Moisture testing and quality inspection
- Standardized packing and labeling
- Container loading supervision

This structured process ensures consistency, hygiene, and controlled quality parameters across shipments.

PRIVATE LABEL SUPPORT

We support importers, distributors, and brand owners in building their own sesame product line with complete private label solutions.

What we offer:

- Customized packaging (Retail packs, bulk packs)
- Flexible quantity planning for trial and scale
- Labeling support as per your market requirements
- Consistent quality across batches
- End-to-end coordination from sourcing to shipment

Our goal is not just to supply but to help you build a stable and scalable product line in your market.

HOW WE WORK

We follow a structured process to make the first transaction smooth and low-risk:

Step 1: Requirement Understanding (Specification, Market, Quantity)

Step 2: Sample / Specification Confirmation

Step 3: Order Finalization with Clear Terms

Step 4: Production Updates & Quality Checks

Step 5: Packing & Loading Supervision

Step 6: Dispatch & Documentation Support

We keep communication transparent at every stage to ensure smooth execution and long-term trust.
